

Zombie Finger Box

Cut out the box and finger pieces. Cut out circle and along red line on box. Score and fold along dotted lines and glue box tabs. Let dry.

Glue or tape finger piece to tightly fit first two joints of your index finger.

Carefully cut along red line to create a little tab that will make it easier to open the box.

Put your index finger through box hole and put on Zombie Finger. You may want to make the circle a little bigger if you have big fingers. Place some shredded paper or tissues in the box for padding. This will make the trick more realistic.

When an unsuspecting friend is closely looking at the Zombie Finger wiggle your finger to make it move. Ooooh! Scary!
