

The Giggle Monster

Cut out the pieces and punch the holes. Cut a two yard piece of string and roll a piece of tape on one end to make a "needle" Starting at the top right hole thread the string through the front and up through the right shoulder hole. Continue threading until all the legs are attached then up through the upper left hole. Tie a knot in the the string to finish. Thread a second piece of string through the left and right hands to make the monster's hands move.
